EXPERTISE

- Angular (1.x)
- React/Redux
- Node/Express/MongoDB
- Git Versioning
- Webpack/Browserify
- WordPress Custom Themes/Plugins
- Chrome Extensions
- Multiple 3rd Party APIs

EXPERIENCE

Indiana Interactive (*UI Developer*) **4/2015 - Present**
Create custom AngularJS applications for various government clients using different combinations of Foundation, Bootstrap, and custom Node development tools. In charge of final tweaks to looks/design of our applications.

Fat Atom (*Web Programmer*) **2/2012 - 4/2015**
Developed themes, plugins, backends for WordPress using Twitter Bootstrap and other grid systems to create responsive, cross-browser websites or extensions.

Purdue University (*Network Operations and Security Officer*) **9/2009 - 12/2011**
Created a custom map to monitor the network status across campus using Adobe Flash and Actionscript, as well as using Request Tracker to respond to security threats.

PROJECTS

Spotify Roadtrip (<https://spotifyroadtrip.com/>) **Angular/Node/Spotify API**
Website for allowing users to load in one or multiple spotify playlists and then shuffles them in an organized fashion so that music is played in a by-user fashion for an evenly shuffled playlist.

Play Midnight (<http://playmidnight.com/>) **Chrome**
Extension for browsers that injects JavaScript and CSS into the Google Music Player website in order to give users a way to customize a darker look for Google Play Music.

iHeartColors **Angular/Node/MongoDB**
A full screen javascript-driven color picker that allows you to pick colors using mouse coordinates to save palettes to your account and public gallery.

More projects/images available on my website.

EDUCATION

Indiana University - Purdue University Indianapolis
Bachelor of Science in Computer Graphic Technology

December 2014
